American Bankers Insurance Company of Florida FLOOD INSURANCE BASICS

The Essentials

- 1. In what community is the property located?
- 2. Community Status Regular or Emergency Program?
- 3. In what zone is the building located?
- 4. What is the building's Date of Construction (DOC)?
- 5. Is the building Pre-FIRM or Post-FIRM?
- 6. Is an Elevation Certificate required?

- 7. What is the occupancy of the building?
- 8. How many floors in building (including basement)?
- 9. Does the building have a basement?
- 10. What is the replacement cost of the building?
- 11. How much insurance is required?
- 12. What deductible has the client requested?

Determining Pre-FIRM and Post-FIRM

Compare Original FIRM Date Post-FIRM Pre-FIRM with Date of Construction (DOC) or Substantial If DOC is on or before If DOC is after 12/31/74 12131/74 or before Improvement Date (Original FIRM is when the or on or after Community first enters the Regular Program) initial FIRM Date, whichever is later initial FIRM Date **Special Flood Hazard Areas Elevation Certificate Requirement** Special Flood Hazard Areas (SFHAs) are the flood zones that have the greatest risk of flooding. They are darkly shaded areas on the ALL Pre-FIRM Zones maps. During a 30-year mortgage, there is a 26% chance of flooding in these areas and only a 4% chance of fire in the same period. Certificate <u>NOT</u> SFHA designations start with the letters A Riverine/ Inland Group or V Post-FIRM Zones Required Coastal Group - inundated by tidal floods with velocity. B, C, X, A99, D and AR The Base Flood Elevation (BFE) and Base Flood Depth (BFD) is the level at which there is a 1 % chance of flooding in any given year. Post-FIRM Zones ZONES BFEs not provided A or V A1-A30, AE, AH, V1-30, VE BFEs are provided. (AE replaces A1-A30 on new A1-A30 AE **A** Unless BFE information is available FIRMS) from the community, use the measured difference between the V1-V30 VE BFEs provided. (VE replaces VI-V30 on new FIRMS) Certificate highest adjacent grade and the top of <u>IS</u> the lowest floor AH Shallow water depths (ponding, 1-3 feet). BFEs are Required provided **AO** Property owner, owner's representative or building official can AO Shallow water paths (Sheet flow, 1-3 feet) BFDs (Base complete. Use 2ft. if no BFDs are Flood Depths) may be provided shown on the Map. A99 A protective system such as dikes, dams and levees.

No BFEs are provided AR Area that results from decertification of a previous flood protection system

> Policies effective on or after 01/01/2007 require two photos with elevation rated risks.

Non-Special Flood Hazard Areas

Non-SFHAs B, C, and X Zones are *moderate/minimal* Flood Hazard Zones. On the FIRM, they are unshaded or lightly shaded. Historically, 25-30% of all claims come from these zones. Shaded X replaces the B Zone and Unshaded X replaces the C Zone on new FIRMS. A Preferred Risk Policy may be available.

Where to Obtain an Elevation Certificate

To find out if a certificate already exists, check with the community department that maintains local maps or the local permit office. To have a certificate completed, contact a licensed land surveyor, registered engineer, architect or community official who is authorized by State or local law to certify elevation information, except as noted above in Zone AO or A (without BFEs).

TYPE OF MAP CHANGE	WHAT YOU SHOULD KNOW	WHAT YOU SHOULD SAY
Low- or moderate-risk zone (B, C, X) changing to a high-risk zone (e.g. AE, or VE) or Change in Base Flood Elevation	Grandfathering Offers Savings	
	 The National Flood Insurance Program (NFIP) has "grandfather" rules to recognize policyholders who have either built in compliance with the flood map or who maintain continuous coverage. These rules allow such policyholders to benefit in the rating for that building. Grandfathering is available for new purchasers as well as existing customers. Always use the new map if it will provide a more favorable premium (lower rate). 	 Your building has been designated in a high-risk area for flooding. You will be required to purchase a flood policy if you carry a mortgage from a federally regulated lender. If you don't carry a mortgage, you should protect your home with flood insurance. National statistics show that you are 3 times more likely to have damage by a flood than by fire. Purchasing before the map revision allows you to save on insurance.
	Loyal Customers Can Keep Existing Zone (Pre- & Post- FIRM)	
	 Customers, who buy a policy before maps are adopted and maintain coverage, can retain the lower-risk zone rate. Eligible customers can purchase a PRP now. It will renew to an X zone rated standard policy. Have a policy: maintain continuous coverage. A policy can be assigned to future property owner. 	
	Show Compliance with a Previous FIRM for Lower Costs (Post- FIRM only)	
	 To keep existing zones when the structure was built: Get a copy of FIRM effective at time of construction or a compliance letter from community official. To keep existing BFE when the structure was built: Get Elev. Cert, and copy of FIRM effective at time of construction; or compliance letter from the community official. 	 Lower cost options: show building was built in compliance at time of construction. Makes you eligible for a lower rate, keeps costs DOWN.
High-risk zone (e.g. A, AE, VE, or V) changing to a low- or moderate-risk zone (X, Shaded X)	Conversion Offers Savings	
	 Write a Preferred Risk Policy (PRP). Use existing policy's current effective date, and use closest coverage limit or next highest options if no exact match. Submit PRP application, and insured signed conversion form. 	 Your risk is reduced, not <i>removed!</i> Eligible for low-cost, Preferred Risk Policy Stay protected and get money back once maps are adopted. No gaps in coverage; no additional money up front. 20-25% of all flood claims occur in low- or moderate-risk areas
	Review of Current Coverage Ensures Protection	
No Change	 Do they have flood insurance? If so, is the building limit up-to-date? Contents coverage provided and limit up-to-date? 	 Homeowners insurance doesn't cover damage due to floods. Floods happen anytime, anywhere. Your home is a major investment – protect it.
